**#CTS2025 is the leading onsite event for climate and procurement leaders, decision-makers, experts, practitioners, and innovators who are championing Scope 3 transformation.**

This year's Climate Transformation Summit, themed "5 Years to Deliver: From Targets to Actions," offers a platform to transform global commitments into actionable solutions, helping companies meet the 2030 climate goals.

## **#CTS2025 in a Nutshell:**

Over two interactive days, the Climate Community will collaborate through keynotes, panels, workshops, and an onsite climate solution trade fair to accelerate the journey toward net zero:

- **Dates:** 4th & 5th June 2025
- **Location:** Impact Hub Berlin
- **Audience:** +100 corporate climate officers, procurement leaders, finance managers, and industry innovators from diverse industries and at different stages of climate transformation; representatives from policy, NGOs and media.
- **Collaboration with Oliver Hurrey** (Founder & Chair, Scope 3 Peer Group) for Day 2, featuring Working Group Deep Dives into Carbon Pricing and Procurement Training.

## **Key Highlights:**

- **Participants** will engage in peer-to-peer exchanges, interactive keynotes, solution exhibitions, and actionable workshops to gain replicable tools, strategies, and partnerships that help make confident, accelerated progress toward net zero.
- **Powerful keynotes, engaging panel discussions and follow-up roundtable discussion with corporate decision makers, experts, policymakers, and researchers** will give insights into strategies, actions and learnings, highlighting both successes and ongoing challenges.
- **Hands-on workshops** will provide participants an opportunity to connect with Scope 3 peers over shared challenges, equipping participants with take-home action plans for immediate implementation.
- **A solution exhibition will allow selected climate solution providers** to showcase latest innovations and tools to support climate transformation throughout supply chains.

## #CTS2025 Key Topics:

- **Supplier Data:** Identifying the essential data needed, how to collect it accurately and at scale, and leveraging it for actionable insights.
- **Supplier Engagement:** Determining which suppliers to engage, at what stage, and the most effective strategies for meaningful collaboration.
- **Climate Transition Plans:** Creating actionable roadmaps to drive impactful Scope 3 decarbonization and make ambitious targets a reality.
- **Internal Alignment and Capability Building:** Understanding the interface and bridging the gap between sustainability and procurement by integrating Scope 3 goals into relevant procurement processes and positioning procurement as a strategic driver of sustainability. Identifying the skills and capabilities needed, from successful supplier engagement to leveraging carbon pricing as a powerful climate financing tool.
- **The Business Case for Scope 3:** Measuring and communicating the business value of Scope 3 decarbonization for brand reputation, sustainable customer value, and bottom line impact—for both internal and external stakeholders, including investment decisions.
- **Industry Collaboration:** Understanding the urgent need for collaboration and action between businesses, policy and academia to address decarbonization blind spots across industries and incentivize action.

## What's in it for You:

- **Elevate Your Brand and Thought Leadership:** Showcase your expertise in Scope 3 action by sharing insights and addressing audience questions, strengthening your external impact.
- **Access Exclusive Networking Opportunities:** Generate high-quality leads through impactful networking with executive-level partners and participants to discuss shared challenges and form strategic partnerships.
- **Drive Industry-Wide Climate Solutions:** Be part of the movement driving real climate action by collaborating with key players in procurement, sustainability, and innovation, contributing to collective progress toward net zero.
